To the Editor,

We would urge our community to vote YES in favor of the Hogback Open Space.

Tax-free amenities are rare and Open Space will provide natural recreation, education and a green area for present and future generations. Our City Leaders had the wisdom and foresight to define 'PROGRESS' as protection and preservation of this ecologically unique area before it was lost forever. Let's do our part in November with a resounding YES vote to accept this gift of responsible management of our environment.
